**Re: Dominion Transmission, Inc., Supply Header Project
West Virginia Segment Protected Bat Species Presence/Probable Absence Survey
and Bat Hibernacula Survey - Year 3 Remaining Surveys**

Dear Ms. Stout:

Since 2014, Dominion Transmission, Inc. (DTI)) has been conducting field routing, environmental, cultural resources, and civil surveys along the proposed pipeline route to collect information needed by the Federal Energy Regulatory Commission (FERC) and other regulatory and land managing agencies to review and permit the Supply Header Project (SHP). Section 7 of the Endangered Species Act requires Federal agencies to verify that any actions authorized, funded, or carried out by the agencies do not jeopardize the continued existence of a federally listed threatened or endangered species, or result in the destruction or adverse modification of designated critical habitat for a federally listed species.

DTI plans to complete remaining surveys during the 2017 field season following the approved 2016 Supply Header Project - West Virginia Segment Protected Bat Species Study Plan Year 2 Presence/Probable Absence Survey and Bat Hibernacula Survey. The study plan describes the scope and methods DTI will implement to address the federally listed northern long-eared bat, Indiana bat, and gray bat. The 2016 Study Plan was approved by the West Virginia Department of Natural Resources on May 16, 2016 and U.S. Fish and Wildlife Service West Virginia Ecological Services Field Office on May 31, 2016.

Summer acoustic surveys will be initiated on May 15, 2017, or as soon thereafter as predicted weather conditions will allow.

Project and Company Background

DTI is proposing to construct and operate approximately 37.5 miles of pipeline loop and modify existing compression facilities in Pennsylvania and West Virginia. Supply Header Project will enable DTI to provide firm transportation service to various customers, including Atlantic Coast Pipeline, LLC, which is proposing to construct the Atlantic Coast Pipeline. For more information about the SHP, visit the company's website at www.dom.com/supplyheader.

DTI looks forward to continuing to coordinate with you on this project. Please contact Richard B. Gangle at (804) 273-2814 or Richard.B.Gangle@dom.com, if there are questions regarding this study plan. Please direct written responses to:

**Subject: Section 106 Review – CD with Supplemental Information for the Phase I Cultural Resource Revised Report, Dominion Transmission, Inc., Supply Header Project
FR#: 15-99-MULTI**

Dear Ms. Pierce:

Please find enclosed a CD with the Revised Phase I cultural resources report, as well as the supporting archaeology site forms, HPI forms, cemetery forms, and shapefiles of the survey coverage. Hard copies of HPI forms and a revised cemetery form are also enclosed.

They are associated with the Dominion Transmission, Inc. (DTI) January 26, 2017, submission that reported on the field surveys for the proposed Supply Header Project conducted from June through September 2016. The Federal Energy Regulatory Commission (FERC) is the lead Federal agency for this Project. DTI's consultant, ERM, conducted the survey and prepared the enclosed report pursuant to the requirements of Section 106 of the National Historic Preservation Act of 1966, as amended.

If you have any questions regarding the enclosed CD or forms, please contact Richard B. Gangle at (804) 273-2814 or Richard.B.Gangle@dom.com, or by letter at:

Richard B. Gangle
Dominion Resources Services, Inc.
5000 Dominion Boulevard

RE: Supply Header Project
FR#: 15-99-MULTI-7 and 15-99-MULTI-8

Dear Mr. Bisha:

We have reviewed the revised draft Phase I Cultural Resource Survey Report dated May 2016 that Natural Resource Group prepared for the aforementioned project. As required by Section 106 of the National Historic Preservation Act, as amended, and its implementing regulations, 36 CFR 800: "Protection of Historic Properties," we submit our comments.

We understand a remaining 1.4 miles of the pipeline route will be surveyed once permission to access those properties is obtained. This may result in further documentation of archaeological sites, architectural properties, and/or cemeteries within an addendum report. Thus, our comments below assume additional documentation will be submitted in the near future for the undertaking. We will provide additional comments upon receipt of that information.

Archaeological Resources:

Thank you for submitting a revised draft report. Upon its review, we find that it addresses the comments made in our February 10, 2016 letter. Specifically, the report now includes maps that indicate the level of survey effort that was conducted throughout the APE as well as an expanded discussion of the survey results. As stated in our February 10 letter, we are in concurrence with recommendations made regarding the archaeological resources that were discovered within the proposed project's APE. We concur that sites 46DO91 and 46TY73 are not eligible for inclusion in the National Register of Historic Places. We also concur that 46DO89 should undergo a Phase II National Register evaluation if it cannot be avoided by the proposed project. With the exception of the areas that have not been surveyed and provided that 46DO89 is avoided, we concur that the proposed project, as currently designed, will have no effect on archaeological historic properties.

Architectural Resources:

Thank you for submitting the revised report, it addressed a number of concerns mentioned in our April 18, 2016 letter. We have reviewed the submitted information and concur with NRG's recommendations that the following properties located within the undertaking's area of potential effects are *not eligible* for or included in the National Register of Historic Places because they have been significantly modified

over the years (i.e., installation of synthetic materials like vinyl siding and windows), which has reduced their historic integrity.

FN-2	FN-12	FN-20	FN-32
FN-3	FN-13	FN-21	HS-0884 (FN-1)
FN-4	FN-14	FN-22	WZ-0032
FN-5	FN-15	FN-23	WZ-0033
FN-8	FN-16	FN-24	WZ-0034
FN-9	FN-17	FN-26	WZ-0035 (FN-25)
FN-10	FN-18	FN-27	
FN-11	FN-19	FN-28	

The report indicated that the property identified as the former Greenbrier School (FN-7) on Greenbrier Road in Doddridge County, has recently been *demolished*.

We concur with NRG's recommendations that the Randolph House (FN-6) is *eligible* for inclusion in the National Register under Criteria B and C due to its association with the Randolph family and architecture, respectively. We also concur that the B&O Short Line–Fishing Creek Spur (WZ-0025-0010/WZ-0036) is *eligible* for inclusion in the National Register under Criterion A for association with transportation and commerce in the region.

We concur with NRG's recommendations that the proposed undertaking will have no adverse effect to the Randolph House and the B&O Short Line. As the report noted, the Randolph property has experienced significant reduction in historic integrity of setting due to the demolition and deterioration of original structures other than the brick home, and construction of newer agricultural structures. In our opinion, the proposed pipeline will not introduce any visual elements that might diminish the property's setting because that setting has already been significantly lost. Furthermore, the line installation will be below surface level. Regarding the Short Line, the project will likely introduce viewshed changes along a short stretch of the Line's route at the crossing near the Allegheny Wood Products' Jacksonburg Sawmill and Lumber Yard along State Highway 20 in Wetzel County. Therefore, it will impose alterations to the setting; however, this change will be small when contextualized by the Line's entire route length. Therefore, it is our opinion the undertaking, as it is currently designed, will have *no adverse effect* on the B&O Short Line or the Randolph property.

Cemetery Resources:

We remain in concurrence with the determination stated in our February 10, 2016 letter. The Victory Baptist Church Cemetery (46-DO-90), in our opinion, is *not eligible* for inclusion in the National Register of Historic Places. It is also our opinion that the Knights of Pythias Cemetery (46-WZ-140) is *not eligible* for inclusion in the National Register of Historic Places under Criteria A, B, C, or D, nor is it eligible under Criteria Considerations C or D. Nevertheless, it is our understanding that these two cemeteries will be avoided by the proposed pipeline.

We appreciate the opportunity to be of service. *If you have questions regarding our comments or the*

**Subject: Section 106 Review –Phase II Investigations at 46DO89
Dominion Transmission, Inc., Supply Header Project
FR#: 15-99-MULTI**

Dear Ms. Pierce:

Dominion Transmission, Inc. (DTI) is requesting review and comment on the enclosed report on Phase II Investigations at 46DO89 located in Doddridge County. The Federal Energy Regulatory Commission (FERC) is the lead Federal agency for this Project. DTI's consultant, ERM, conducted the survey and prepared the enclosed report pursuant to the requirements of Section 106 of the National Historic Preservation Act of 1966, as amended.

DTI would appreciate your comments on the attached Phase II report, and we look forward to continuing to work with you on this Project. If you have any questions regarding the enclosed report, please contact Richard B. Gangle at (804) 273-2814 or Richard.B.Gangle@dom.com, or by letter at:

Richard B. Gangle
