ATLANTIC COAST PIPELINE – Docket Nos. CP15-554-000 and CP15-554-001**SUPPLY HEADER PROJECT – Docket No. CP15-555-000****1.0 PROJECT DESCRIPTION AND ENGINEERING****1.1 Site-Specific Horizontal Directional Drill Plan**

Atlantic Coast Pipeline, LLC's (Atlantic's) supplemental filing on January 19, 2017 (FERC Accession Number 20170119-5180) identified a new horizontal directional drill (HDD) crossing at approximate MP 71.0 of the AP-3 pipeline (along the Gateway Route Adjustment) to avoid the Hampton Roads Airport Wetland Mitigation Bank and cross West Military Highway (Route 58). A site-specific HDD design plan, geotechnical study, and feasibility study for this crossing are provided in Appendix A. No Noise Sensitive Areas were identified within a half-mile radius of the HDD, therefore a noise analysis is not needed.

2.0 ENVIRONMENTAL AND CULTURAL RESOURCES**2.1 Update on Agency Consultations Regarding Rookeries**

Staff Recommendation 36 of the Draft Environmental Impact Statement for the Atlantic Coast Pipeline (ACP) and Supply Header Project (SHP) directed Atlantic to “coordinate with [the] Virginia Department of Game and Inland Fisheries (VDGIF), West Virginia Division of Natural Resources (WVDNR), and North Carolina Wildlife Resources Commission (NCWRC) to verify that no additional conservation measures would be required for the National Heritage Inventory and Center for Conservation Biology rookeries, and provide copies of agency correspondence related to these discussions.” Atlantic conducted pedestrian surveys in February 2017 in the ACP Project area in West Virginia, Virginia, and North Carolina to investigate bird activity and evaluate site conditions at rookeries identified during prior aerial survey or from available state databases. The results of these surveys along with proposed conservation measures for rookeries were sent to the VDGIF, WVDNR, and NCWRC on April 12, 2017. Copies of the letters to each agency are provided with Appendix C. Atlantic will file comments from the agencies on the survey results and proposed conservation measures when available.

2.2 Laurel Run Macroinvertebrate Survey Report

Staff Recommendation 44 of the DEIS for the ACP and SHP directed Atlantic to perform baseline benthic macroinvertebrate surveys at Laurel Run, provide the results of the survey to the George Washington National Forest (GWNF), and file the results and the GWNF comments on the results with the Secretary. Atlantic sent a copy of the report to the GWNF for review on April 12, 2017. Both the survey report and Atlantic's transmittal letter to the GWNF are provided as Appendix B in partial fulfillment of Staff Recommendation 44. Because the report contains location information for sensitive species, Appendix B has been filed under separate cover, which is marked “Contains Privileged Information – Do Not Release”. Atlantic will file comments on the survey report from the GWNF when available.
