Re: Atlantic Coast Pipeline and Supply Header Project Submittal of updated Draft Biological Assessment and Migratory Bird Plan

Dear Ms. Turner:

Atlantic Coast Pipeline, LLC (Atlantic) is a company formed by four major U.S. energy companies – Dominion, Duke Energy, Piedmont Natural Gas, and Southern Company Gas. The company was created to develop, own, and operate the proposed Atlantic Coast Pipeline (ACP), an approximately 600-mile-long, interstate natural gas transmission pipeline system designed to meet growing energy needs in Virginia and North Carolina. For more information about the ACP, visit the company's website at www.dom.com/acpipeline. Atlantic has contracted with Dominion Transmission, Inc. (DTI), a subsidiary of Dominion, to permit, build, and operate the ACP on behalf of Atlantic.

In addition, DTI proposes to construct and operate approximately 37.5 miles of pipeline loop and modify existing compression facilities in Pennsylvania and West Virginia. This Project is referred to as the Supply Header Project (SHP) and will enable DTI to provide firm transportation service of up to 1.5 million dekatherms per day (MMDth/d) to various customers, including Atlantic. Atlantic will be a Foundation Shipper in the SHP, and will utilize the SHP capacity to allow its shippers access to natural gas supplies from various DTI receipt points for further delivery to points along the ACP.

Atlantic and DTI are seeking authorization from the Federal Energy Regulatory Commission (FERC) under Section 7(c) of the Natural Gas Act (NGA) to construct, own, operate, and maintain the proposed facilities. As required under Section 7 of the Endangered Species Act of 1973 (as amended), projects that require Federal authorization must undergo consultation with U.S. Fish and Wildlife Service and the National Oceanic and Atmospheric Administration National Marine Fisheries Service.

Ms. Melinda Turner January 27, 2016 Page 2 of 2

Atlantic and DTI have prepared this draft Biological Assessment (BA) and Migratory Bird Plan at the request of the FERC as the lead federal agency. With this submittal of the BA Atlantic is requesting that FERC initiate formal consultation with the FWS and NOAA Fisheries.

We look forward to continuing to work with you on the ACP. Please contact Richard B. Gangle at (804) 273-2814 or Richard.B.Gangle@dom.com, if there are questions regarding this report. Please direct written responses to:

Glen Allen, VA 23060

ER 2015-0336-042-I: Supply Header Project, Greene and Westmoreland Counties, Phase I Historic Architectural Reconnaissance Survey Report Revised Addendum 1

Dear Mr. Scarpinato,

Thank you for submitting information concerning the above referenced project. The Pennsylvania State Historic Preservation Office (PA SHPO) reviews projects in accordance with state and federal laws. Section 106 of the National Historic Preservation Act of 1966, and the implementing regulations (36 CFR Part 800) of the Advisory Council on Historic Preservation, is the primary federal legislation. The Environmental Rights amendment, Article 1, Section 27 of the Pennsylvania Constitution and the Pennsylvania History Code, 37 Pa. Cons. Stat. Section 500 et seq. (1988) is the primary state legislation. These laws include consideration of the project's potential effects on both historic and archaeological resources.

Determination of Eligibility

It is the opinion of the Pennsylvania State Historic Preservation Officer that the following property is eligible for listing in the National Register of Historic Places under Criterion A (Agriculture) under the Allegheny Mountain Part-Time Farming Region, with a Period of Significance of circa 1900 – 1960, and a NRHP proposed boundary of approximately 121.3 acres:

Borland Farm, 2151 Borland Farm Road, Export

Our determination of eligibility is based upon the information provided and available in our files for review. If National Register listing for this property is sought in the future, additional documentation of the property's significance and integrity may be required to both verify this determination of eligibility and satisfy the requirements of the National Park Service (36 CFR Part 60). Thus, the outcome of the National Register listing process cannot be assured by this determination of eligibility.

Determination of Effect

We concur that the project will have no adverse effect on the Borland Farm.

Additional Information

Thank you for providing the documentation that the JW Cochran House (Key 047760) is no longer extant.

Please provide an unbound copy of the HRSFs for inclusion in our files for the Borland Farm and the initial submission (dated 3/21/2016) if they have not already been provided.

If you have questions, please contact Cheryl L. Nagle at 717.772.4519 or chnagle@pa.gov.

Sincerely,

Douglas C. McLearen, Chief

Dolone
