Subject: Supply Header Project Pre-Construction Notification LRH-2014-1110

Good Morning,

The Huntington District received the pre-construction notification for the portions of the Supply Header Project within its area of responsibility on September 7, 2017. The Huntington District requires the following information in order to continue to process the pre-construction notification:

1. Final concurrence from the West Virginia Division of Culture and History and State Historic Preservation Officer regarding potential effects to properties listed or eligible for listing on the National Register of Historic Places. Alternatively, the FERC's documentation that Section 106 obligations are complete.
2. Final concurrence from the United States Fish and Wildlife Service regarding federally threatened and endangered species. Alternatively, the FERC's documentation that Section 7 obligations are complete.
3. A mitigation proposal consistent with the mitigation rule found at 33 CFR 332 and compliant with the Nationwide Permit General Condition 23.
4. Please provide a set of maps to indicate which aquatic resources were delineated remotely for those parcels for which access has not been granted. If the delineation mapping (topographic and aerial photography) that has been provided could be updated with boundaries indicating which sites have not been accessed on-the-ground it should suffice.

Please contact me with any questions or concerns.

Sincerely,

Adam Fannin

Subject: Supply Header Project Pre-Construction Notification LRH-2014-1110

Adam,

Please find attached DETI's response to the information requested on October 11, 2017. To summarize the enclosed:

1. DETI filed with FERC today a reroute to avoid a Phase III site at McElroy Creek. This site was the only known resource to be affected by the project under Section 106. The reroute was previously studied for cultural resources and those results were provided to WVDCH. WVDCH provided a response on October 31, 2016 stating that they concurred with the reported finding that the addendum area (reroute) will have no effect on archaeological historic properties. DETI filed a letter with WVDCH today notifying them of the reroute and asking for concurrence. That letter and the October 31, 2016 letter from the WVDCH are attached to this response. Additionally, the remaining approximately two miles of pipeline corridor to be reviewed by WVDCH was recently studied and a report of no findings will be submitted to WVDCH this week. Assuming concurrence on that report is received, Section 106 for the Supply Header Project is anticipated to be complete. DETI will provide you with a copy of the outgoing letter later this week and will send you a copy of WVDCH's response when received.
2. DETI received the Endangered Species Biological Opinion for the SHP on October 16, 2017, which is included with this response.
3. DETI is in the process of developing a detailed wetland compensatory mitigation plan for impacts. It is anticipated that a detailed conceptual mitigation plan will be provided to the USACE for review by early November 2017. DETI will continue to update the USACE staff as the plan is completed.
4. DETI completed the remaining surveys for the SHP route between milepost 5.7 and 6.7 in October 2017. The updated topographic and aerial maps, water resource impact table (Table 2.0-1), single and complete crossing table (Table 2.0-2), and wetland and waterbody data sheets reflecting the delineated features are attached to this response.

Please let us know if you have any questions on the enclosed or need additional information to continue your review.

Sincerely,
Jennifer

**Re: Dominion Energy Transmission, Inc. Supply Header Project
Pre-construction Notification Application Supplement (Application No. LRH-2014-110)
Response to Data Request Received on October 11, 2017**

Dear Mr. Fannin:

Dominion Energy Transmission, Inc. (DETI) is submitting the following for the Supply Header Project (SHP) in response to the requests, shown in bold text below, received by e-mail on October 11, 2017.

- 1. Final concurrence from the West Virginia Division of Culture and History and State Historic Preservation Officer regarding potential effects to properties listed or eligible for listing on the National Register of Historic Places. Alternatively, the FERC's documentation that Section 106 obligations are complete.**
 - DETI filed with FERC today a reroute to avoid a Phase III site at McElroy Creek. This site was the only known resource to be affected by the project under Section 106. The reroute was previously studied for cultural resources and those results were provided to WVDCH. WVDCH provided a response on October 31, 2016 stating that they concurred with the reported finding that the addendum area (reroute) will have no effect on archaeological historic properties. DETI filed a letter with WVDCH today notifying them of the reroute and asking for concurrence. That letter and the October 31, 2016 letter from the WVDCH are attached to this response.
 - Additionally, the remaining approximately two miles of pipeline corridor to be reviewed by WVDCH was recently studied and a report of no findings will be submitted to WVDCH this week. Assuming concurrence on that report is received, Section 106 for the Supply Header Project is anticipated to be complete. DETI will provide you with a copy of the outgoing letter later this week and will send you a copy of WVDCH's response when received.
- 2. Final concurrence from the United States Fish and Wildlife Service regarding federally threatened and endangered species. Alternatively, the FERC's documentation that Section 7 obligations are complete.**
 - DETI received the Endangered Species Biological Opinion for the SHP on October 16, 2017, which is included with this response.

- 3. A mitigation proposal consistent with the mitigation rule found at 33 CFR 332 and compliant with the Nationwide Permit General Condition 23.**
 - DETI is in the process of developing a detailed wetland compensatory mitigation plan for impacts associated with the SHP. It is anticipated that a detailed conceptual mitigation plan will be provided to the USACE for review by early November 2017. DETI will continue to update the USACE staff as the plan is completed.

- 4. Please provide a set of maps to indicate which aquatic resources were delineated remotely for those parcels for which access has not been granted. If the delineation mapping (topographic and aerial photography) that has been provided could be updated with boundaries indicating which sites have not been accessed on-the-ground it should suffice.**
 - DETI completed the remaining surveys for the SHP route between milepost 5.7 and 6.7 in October 2017. The updated topographic and aerial maps, water resource impact table (Table 2.0-1), single and complete crossing table (Table 2.0-2), and wetland and waterbody data sheets reflecting the delineated features are attached to this response.

DETI also made minor updates to the access road impacts on Tables 2.0-1 and 2.0-2 to account for the shift from permanent to temporary access road impacts resulting in a decrease in overall wetland and waterbody impacts.

Please contact me at (804) 273-2814 or Richard.B.Gangle@dominionenergy.com, if there are questions regarding the pre-construction notification.

Subject: DETI - Supply Header Project (2015-1330)

Josh,

FERC issued the Certificate of Public Convenience and Necessity for the Supply Header Project (2015-1330) on Friday, October 13, 2017. In an effort to keep you updated, we would like to provide the following information to assist with your review of the Project.

1. The Biological Opinion was received from USFW on October 16, 2017. It is attached to this email for Project file.
2. Section 106 consultation continues, however we anticipate concurrence of no effect soon based on the following updates:
 - a. DETI filed with FERC today a reroute to avoid a Phase III site at McElroy Creek. This site was the only known resource to be affected by the project under Section 106. The reroute was previously studied for cultural resources and those results were provided to WVDCH. WVDCH provided a response on October 31, 2016 stating that they concurred with the reported finding that the addendum area (reroute) will have no effect on archaeological historic properties. DETI filed a letter with WVDCH today notifying them of the reroute and asking for concurrence. That letter is attached to this email.
 - b. Additionally, the remaining approximately two miles of pipeline corridor to be reviewed by WVDCH was recently studied and a report of no findings will be submitted to WVDCH this week. Assuming concurrence on that report is received, Section 106 for the Supply Header Project is anticipated to be complete. DETI will provide you with a copy of the outgoing letter later this week and will send you a copy of WVDCH's response when received.

Please let us know if you have questions on these Project updates or need additional information to continue your review.

Sincerely,

Jennifer

**Subject: Section 106 Review –Phase I Cultural Resource Survey Report Addendum 3
Dominion Energy Transmission, Inc., Supply Header Project
FR#: 15-99-MULTI**

Dear Ms. Pierce:

Dominion Energy Transmission, Inc. (DETI) is requesting review and comment on the enclosed addendum Phase I archaeological survey report, which reports on the field surveys for the proposed Supply Header Project conducted in October 2017. The Federal Energy Regulatory Commission (FERC) is the lead Federal agency for this Project. DETI's consultant, ERM, conducted the survey and prepared the enclosed report pursuant to the requirements of Section 106 of the National Historic Preservation Act of 1966, as amended.

Atlantic would appreciate your comments on the enclosed addendum report, and we look forward to continuing to work with you on this Project. If you have any questions regarding the enclosed reports, please contact me at (804) 273-2814 or Richard.B.Gangle@dominionenergy.com, or by letter at:

Richard B. Gangle
Dominion Energy Services, Inc.
5000 Dominion Boulevard
Glen Allen, Virginia 23060

Respectfully submitted,
