Atlantic will hire more than 1,300 inspectors

TYPES OF INSPECTORS NEEDED

- Chief Inspector
- Surveying
- Clearing
- Grading
- Ditching
- Stringing
- Bending
- Coating
- Welding
- Lowering-in
- Padding & Backfill
- Rough Grade
- Final Grade & Cleanup
- Hydrostatic Testing
- Road Bores
- Non-destructive Testing
- Material Handling
- Facility Construction
- Concrete
- Electrical and Instrumentation
- Environmental
- Safety

REQUIRED CERTIFICATIONS

Atlantic will hire inspectors certified through the American Petroleum Institute's (API) Source Inspector Certification Programs. The API programs are designed by inspection and quality subject matter experts specifically for the oil and gas industry. Requirements vary depending on the type of inspector. The programs are based on industry-developed standards recognized and used with confidence worldwide. Details of the Certification Programs are available on the API website at www.api.org/icp.

API's Individual Certification Programs

- Provide knowledgeable specialized instructors
- Establish a minimum standard of knowledge and skill for personnel
- Provide higher management control of inspection practices
- Help maintain safety and a high level of performance

HIRING PROCESS AND TIMELINE

Construction of the Atlantic Coast Pipeline is expected to begin in 2018. Construction plans are under development and Atlantic will begin hiring inspector crews as plans are finalized. Up to 85 inspectors will be needed for each spread. Inspector crews will be needed for both the 2018 and 2019 construction seasons.

Atlantic will work with six main companies to hire inspectors.

- EnSite USA
- UniversalPegasus International
- Quality Integrated Services
- Gulf Interstate Field Services
- BJ Inspections
- Cleveland Integrity Services

Environmental Stewardship

Our commitment to environmental protection begins with the exhaustive process of selecting an environmentally responsible route, but extends through every phase of the project — from the first days of construction through the final days of restoration.

- **Best-In-Class Steep Slopes Program**
- **Migratory Bird Plan**
- **Erosion and Sediment Control Plan**
- **Pollinator Habitat Program**
- **Storm Water Pollution Prevention Plan**
- **Invasive Plant Species Management Plan**
- **Karst Terrain Assessment, Construction, Monitoring and Mitigation Plan**
